

Date: February 13, 2012
Subject: JIS C-8704-2 & IEC 60896-2
From: Bruno Ender, V.P. Sales & Mktg.

TO WHOM IT MAY CONCERN

This is to certify that Power-Sonic's line of sealed, rechargeable AGM type VRLA batteries meets all of the standards and test parameters outlined in

JIS C-9704-2:1999, IEC 60896-2, and AS 4029.2 2000.

Records to this effect are recorded and on file at the factory's documentation archives. For purposes of this clarification actual test reports are not made available. The features and characteristics called for in these standards are common and everyday requirements for this type of battery and are also documented via the US' UL component recognition program.

Power-Sonic Corporation

A handwritten signature in black ink, appearing to read "Bruno A. Ender".
